THE

AMERICAN JOURNAL

OF

SCIENCE AND ARTS.

CONDUCTED BY

PROFESSORS B. SILLIMAN, B. SILLIMAN, JR.,

AND

JAMES D. DANA,

IN CONNECTION WITH

PROF. ASA GRAY, OF CAMBRIDGE,
PROF. LOUIS AGASSIZ, OF CAMBRIDGE,
DR. WOLCOTT GIBBS, OF NEW YORK.

SECOND SERIES.

VOL. XXXII.—NOVEMBER, 1861.

NEW HAVEN: EDITORS.
1861.

PRINTED BY E. HAYES, 426 CHAPEL ST.

CONTENTS OF VOLUME XXXII.

NUMBER XCIV.

Page.

ART. I. Researches of Pasteur respecting the Theory of Spontaneous Generation; translated and condensed by M. C. WHITE, M.D., - - - - - - - - - - 1

II. Natro-boro-calcite and another Borate occurring in the Gypsum of Nova Scotia; by Prof. HENRY HOW, - - - - 9

III. On Gyrolite occurring with Calcite in Apophyllite in the Trap of the Bay of Fundy; by Prof. HENRY HOW, - - 13

IV. On some questions concerning the Coal formations of the United States; by LEO LESQUEREUX, - - - - - 15

V. On the Production of the Ethyl Bases; by M. CAREY LEA, 25

VI. On the Exact Separation of the Ethyl Bases; by M. CAREY LEA, 26

VII. On the Path and Velocity of the Guernsey County (Ohio) Meteor of May 1st, 1860; by Prof. E. W. EVANS, - - 30

VIII. Caricography; by Prof. C. DEWEY, - - - - - 38

IX. Remarks on the Mesozoic Red Sandstone of the Atlantic Slope, and notice of the Discovery of a Bone Bed therein, at Phœnixville, Penn.; by CHARLES M. WHEATLEY, M.A., 41

X. On the Classification of Organic Substances by Series; by JAMES SCHIEL, - - - - - - - - - - 48

XI. Theoretical Determination of the Dimensions of Donati's Comet; by Prof. W. A. NORTON, - - - - - - 54

XII. The Great Auroral Exhibition of Aug. 28th to Sept. 4th, 1859.—7th Article; by Prof. ELIAS LOOMIS, - - - 71

XIII. Rock Oil, its Geological Relations and Distribution; by Prof. E. B. ANDREWS, - - - - - - - - - 85

XIV. On the Crystalline Form of the Hydrate of Magnesia from Texas in Pennsylvania; by GEORGE J. BRUSH, - - 94

XV. Correspondence of JEROME NICKLÈS.—Academy of Sciences—Distribution of Prizes: The Astronomical Prize: The Cuvierian Prize, 95.—Chemical Prize: Prize in Experimental Physiology, 96.—Subjects proposed for prizes next year: Medical prizes, 97.—Grand Surgical Prize: —Employment of Glycerine in Surgery: Antagonism of the poisoning effects of strychnine and curare: An unpublished memoir by Lavoisier, 98.—The tunnel of Mount Cenis: *Obituary*—Cordier, 101.—Acclimation; Sheep: Acclimation of the Silkworm, 102.—Acclimation of the Ostrich: Acclimation of the Cotton-Plant: Bibliography, 103.

SCIENTIFIC INTELLIGENCE.

Physics.—On the propagation of heat in gases, MAGNUS, 104.—On a new Unit of Electrical Resistance, MATTIESSEN: On Spectral Observations, MOUSSON, 105.—On the Absorption and Radiation of Heat by Gases and Vapors, and on the Physical connection of Radiation, Absorption and Conduction, TYNDALL, 106.—A note on the power of Polarization of American Oil of Turpentine; by Dr. F. MAHLA, 107.

Chemistry.—On Salts of Chlorine and other Electro-negative Elements, SCHÜTZENBERGER, On Polyglyceric Alcohols and Anhydrids, LOURENÇO, 108.—On Ozone, Nitrous Acid and Nitrogen, by T. STERRY HUNT, F.R.S, 109.

New Books.—Die Lehre vom Galvanismus und Electro-magnetismus, von GUSTAV WIEDEMANN: Der Electro-magnetismus von JULIUS DUB, 110.—Les électro-Aimants et L'Adhérence Magnétique par M. J. NICKLÈS: Die Fluorescens des Lichtes umgetragen von J. PISKO: Einleitung in das Studium der Organischen Chemie, von J. SCHIEL: Allgemeine Encyclopädie der Physik—Herausgegeben von GUSTAV KARSTEN, 111.

Chemical Geology.—Experiments on the deportment of Carbonate of Lime at a high temperature, both with fluxes and alone, by G. ROSE, 112.

Technical Chemistry.—On the occurrence of soluble compounds of Copper, Lead and Tin in newly-distilled Alcoholic Spirits, 114.—Local Decomposition in Lead Aqueduct Pipes, 115.—Nature of the deposit which forms upon the copper employed in Reinsch's test for arsenic, LIPPERT: Saponification by alkaline carbonates in the dry way, 117. —Preparation of Hydrate of Baryta by means of Oxyd of Zinc, 118.

Geology.—Kentucky Geological Survey, by LEO LESQUEREUX, Assistant, 118.—Descriptions of new fossils from the Palæozoic rocks of the Western States, by J. H. M'CHESNEY, 122.

Botany.—Flora Hongkongensis: a Description of the Flowering Plants, etc., by GEORGE BENTHAM, V.P.L.S., 124.—Annals of the Botanical Society of Canada: Journal of the Proceedings of the Linnæan Society: Class-Book of Botany, by ALPHONSO WOOD, 127 —The Natural History Review, a Quarterly Journal of Biological Science, 130.

Astronomy and Meteorology.—The recently discovered Asteroids, 132.—The Comet discovered by Mr. Thatcher, 134.—On the Algebraical and numerical theory of errors of observations and the combination of observations, by GEORGE BIDDELL AIRY, M.A., etc., 135.

Meteorology.—Hraschina near Agram, 135.—Leitform—Or the typical form of Meteorites, 137.—St. Denis-Westrem, 140.—Calcutta Meteorites, (1) Shalka, 141; (2) Quenggouk, (3) Dhurmsala, (4) Futtehpore, 142; (5) Pegu, (6) Assam, (7) Segowlee, 143.—The me-

teoric iron from Tula, Russia, 144.—The meteoric iron from Nebraska, 146.—Abstract of Meteorological Observations, made during the year 1860, with the averages of eight years, at Sacramento, Cal., by THOMAS M. LOGAN, M.D., 147.

Miscellaneous Scientific Intelligence.—National Observatory: Earthquake at Mendoza: Prussian Expedition to Japan and China, 148.—Correction, 149.

Book Notices.—Ancient Works in Western New York: An Elementary Treatise on Human Anatomy, by JOSEPH LEIDY, 149.—Handbuch der metallurgischen Hüttenkunde, von BRUNO KERL, 150.

Obituary.—Dr. Charles Robb: Hermann Dauber, 150.

Books received, 150.—*Brochures*—Physical and Astronomical: Chemical: Anatomical and Zoological, 152.

NUMBER XCV.

Page.

ART. XVI. Waterglass; by J. M. ORDWAY, - - - - - 153

XVII. Sketch of the Distribution of Forest-trees in Nebraska Territory; by JAMES T. ALLEN.—(In a letter to Prof. GRAY), 165

XVIII. Remarks on the Age of the Goniatite Limestone at Rockford, Indiana, and its relations to the "Black Slate" of the Western States, and to some of the succeeding rocks above the latter; by F. B. MEEK and A. H. WORTHEN, - - 167

XIX. Chemical Contributions; by M. CAREY LEA, - 177, 210

XX. Contributions to the History of Picric Acid; by M. C. LEA, 180

XXI. On the Relation between our Perception of Distance and Color; by Prof. O. N. ROOD, - - - - - - 184

XXII. On the Practical Application of Photography to the Microscope; by Prof. O. N. ROOD, - - - - - - 186

XXIII. On some questions concerning the Coal Formations of North America; by LEO LESQUEREUX, (continued), - 193

XXIV. Observations upon the Freezing of Water at the Passaic Chemical Works, Newark, N. J.; by ARTEMAS BIGELOW, 205

XXV. Note on the probable Age of the White Limestone, at Sussex and Franklin Zinc Mines, New Jersey; by Prof. GEORGE H. COOKE, - - - - - - - - - 208

XXVI. Chemical Contributions; by M. C. LEA, - - - 210

XXVII. On the Production of new Coloring Matters by Decomposition of Nitronapthaline and Dinitronaphthaline; by M. C. LEA, - - - - - - - - - - - 211

XXVIII. The Primordial Zone of Texas, with descriptions of New Fossils; by B. F. SHUMARD, - - - - - - 213

XXIX. On the constitution of the Planetary System; and on the theory and tables of Mars, (in a letter addressed to Marshal

Page.

VAILLANT); by M. U.-J. LEVERRIER, - - - - - 222

XXX. Upon some Improvements, proposed by Sir David Brewster, in the Photographic Camera; by EDWIN EMERSON, - - 227

XXXI. On the Age of the Red Sandstone formation of Vermont; by E. BILLINGS, - - - - - - - - - - 232

XXXII. Agricultural Chemistry—Soil-analysis: Notice of the Agricultural Chemistry of the Geological Surveys of Kentucky and Arkansas; by Prof. S. W. JOHNSON, - - 233

XXXIII. The Great Comet of 1861.—1. Observations at New Haven, 252.—2. Observations at Washington, 254.—3. The Comet, as seen at the Observatory of Harvard College, Cambridge, Mass.; by G. P. BOND, Director, 255.—4. Continuation of Account of Comet II; by G. P. BOND, 261.—5. Additional Observations at the U. S. Naval Observatory, Washington; communicated by Lt. J. M. GILLISS, 265.—6. Elements of the Comet, obtained at Harverford Observatory; by Mr. M. C. STEVENS, 266.

SCIENTIFIC INTELLIGENCE.

Technical Chemistry.—On the Coloring Matters derived from Coal Tar; by Mr. H. W. PERKIN, F.C.S.: Aniline, 267.—Aniline Purple, generally known as Tyrian Purple, Mauve, Phenamine, Indisine, &c., 268.—Violine: Roseine, 270.—Fuchsine or Magenta: Preparation of Fuchsine by the Action of Bichlorid of Tin on Aniline, 271.—Preparation of Fuchsine by the Action of Nitrate of Mercury on Aniline, 272.—Action of Sulphate of Copper when employed as a preservative of wood, KŒNIG, 274.—Ozone as a means of restoring old and faded engravings, etc., v. GORUP-BESANEZ, 275.—New Anæsthetic, 276.

Analytical Chemistry.—Reinsch's test for Arsenic not applicable to solutions containing Arsenic acid, WERTHER, 277.

Geology.—Reply to Mr. Marcou's strictures on Mr. F. B. Meek in his Notes on the Cretaceous and Carboniferous Rocks of Texas, 278.—Note on Mr. Lesquereux's Table of Comparative Sections of Coal Measures, by J. P. LESLEY, 281.—On the origin of some Magnesian and Aluminous Rocks, by T. STERRY HUNT, F.R.S., 286.—Note to the paper of Messrs. Meek and Worthen on the Age of the Goniatite Limestone, 288.

Botany.—Martius, Flora Brasiliensis: Floræ Columbiæ terrarumque adjacentium Specimina Selecta, edidit H. KARSTEN: Journal of the Proceedings of the Linnæan Society, 289.—Calluna vulgaris and Aira caryophyllea in the United States, 290.

Astronomy and Meteorology.—The recently discovered Asteroids, 291.—Note Explanatory of Baily's Beads, by EDMUND BLUNT, 292.—Meteoric Observations, April 20 and Aug 10, 1861: 1. New Haven, Conn.: 2. Burlington, N. J., 294.—3. Natick, Mass., 295.—Remarkable Rain-Fall in Ohio, by S. B. MCMILLAN: Rain following the discharge of Ordnance, 296.

Miscellaneous Scientific Intelligence.—Earthquake on the Island of Penang: Earthquake at Syracuse, New York: On the Natural Dissemination of Gold, 297.—Notice of Chemical and Physical Apparatus, by Becker & Sons, 298.

Book Notices—The Mathematical Works of Isaac Barrow, D.D., by W. Whewell, D.D., 299.—Results of a scientific mission to India and High Asia, by Herman, Adolphe and Robert de Schlagintweit, 300.—Microscopic Anatomy of the Lumbar Enlargement of the Spinal Cord, by John Dean, 302.—Summary of Medical Science, by Walter S. Wells: Report on the Geology and Agriculture of the State of Mississippi, by Eugene W. Hilgard, Ph.D.: First Biennial Report of the progress of the Geological Survey of Michigan, 303.

Brochures.—Zoological and Anatomical, 303.—Geological: Miscellaneous, 304.

Personal.—Correction: The late Dr. Robb: Loring W. Bailey, Esq., succeeds Dr. Robb: Postscript—Earthquake at Louisville, Cincinnati, &c., 304.

NUMBER XCVI.

Page.

Art. XXXIV. Physical Aspects of the Comet II, 1861; by Commr. J. M. Gilliss, - - - - - - - - - 305

XXXV. A Sketch of the Life and Scientific Services of John Evans, M.D., U. S. Geologist for Oregon and Washington Territories, etc.; by Charles T. Jackson, M.D., - - 311

XXXVI. On the great Auroral Exhibition of Aug. 28th to Sept. 4th, 1859, and on Auroras generally—8th Article; by Prof. Elias Loomis, - - - - - - - - - - 318

XXXVII. On the evidence furnished by Photography as to the nature of the markings on the Pleurosigma Angulatum; by Prof. O. N. Rood, - - - - - - - - - 335

XXXVIII. Waterglass; by J. M. Ordway,—(continued), - - 337

XXXIX. On the Fossil Fruits found in connection with the Lignites of Brandon, Vt.; by Leo Lesquereux, - - - - 355

XL. Thirty-First Congress of the British Association for the Advancement of Science—with extracts from the Address of Mr. Fairbairn at the opening, - - - - - - - - 363

XLI. Note on a Compound of Ammonia, Mercury and Nitric Acid; by M. Carey Lea, - - - - - - - - 374

XLII. An Instrument designed to illustrate certain resultant vibrations in Polarized Light; by Prof. E. S. Snell, - - 376

XLIII. Arsenic as an Impurity of Metallic Zinc; by Chas. W. Eliot and Frank H. Storer, - - - - - - - 380

XLIV. The Gold of Nova Scotia; by O. C. Marsh, A.B., - 395

XLV. Notice of a Meteorite which fell in Hindostan in 1857; by Prof. J. Lang Cassels, M.D., - - - - - - - 401

XLVI. On an Improvement in the Lenticular Sterescope; by Prof. E. Emerson, - - - - - - - - - 403

SCIENTIFIC INTELLIGENCE.

Physics.—Photographs of Spectra exhibited to the Chemical Section of the British Association; by Prof. W. A. MILLER, 408.—On Cæsium and Rubidium, BUNSEN, 409.—Probable existence of a new Element, CROOKES, 411.—Reduction of Sulphuric acid by Nascent Hydrogen, KOLBE: On certain Organic Acids, 412.—Mathematical Theory of Homologous Series, BACOLOGLO, 413.—On the Conversion of Monobromid of Ethylene into Acetylene, SAWITCH, 414.—On the Reproduction of certain Crystalline Minerals, H. SAINT CLAIRE DEVILLE, 415.—On a new characteristic of the so-called semi-metals; by Prof. JEROME NICKLÈS, 416.

Technical Chemistry.—On the Coloring Matters Derived from Coal-Tar; by Mr. H. W. PERKIN, F.C.S.: Bleu de Paris, 416.—Aniline Green, or Emeraldine: Nitroso Phenyline, 417.—Dinitraniline: Nitrophenyline-diamine or Nitrozophenalimine: Picric or Dinitrophenic Acid, 418.—Rosolic acid, 419.—The Coloring Matters of Quinoline or Chinoline, 420.—Naphthaline Colors: Chloroxynaphthalic and Perchloroxynaphthalic Acids, 421.—Carminaphtha: Ninaphthalamine, 422.—Nitroso-naphthaline: Naphthamein: Tar Red, 423.—Azuline: Application of Nitrosonaphthaline, 424.—Blast for Laboratory use; by Dr. H. SPRENGEL, 425.

Photography.—A rapid Collodion: A rapid dry process, 426.

Geology.—On the Taconic System of Dr. Emmons; by T. STERRY HUNT, M.A., F.R.S., 427.—Contributions to Palæontology, J. HALL, 430.

Zoology.—Synopsis of a Course of Lectures given at the Museum of Natural History, (Paris), in 1850; by M. ISODORE GEOFFROY SAINT-HILAIRE: On the Animal Series, and the Parallelic Classification, 431.—Summary of lessons on the question of species, 432.—On some Objects of Natural History from the Collection of Mr. Du Chaillu; by Prof. OWEN, 435.—On the Height of the Gorilla; by Dr. J. E. GRAY, 437.—Cambridge Museum of Comparative Zoology, 438.

Astronomy and Meteorology.—Discovery of the 71st Asteroid: Re-discovery of Pseudo-Daphne, 438.—Comet II, 1861, 438.

Meteorology.—Notices of Meteors and Meteoric Masses; by Director HAIDINGER, 440.—Remarkable Meteor, Oct. 4, 1861, 443.—Observations respecting the Periodic Meteors of August; by ALEX. C. TWINING, 444.—Grand Meteor of August 10, 1861—Elements of the August ring of Meteors; by H. A. NEWTON, 448.

Miscellaneous and Scientific Intelligence.—Return of the Arctic Expedition of Dr. Hayes, 451.—The earthquake of 31st August, 453.—Letter from C. Hitchcock, Esq., on the first observation on the fossils of the Red Sandstone formation of Vermont: Atlantic and Pacific Telegraph: Nicotine: Geological Survey of Wisconsin, 454.—Eighty Years Progress of the United States, etc.: New American Cyclopedia, 455.

Personal.—Prof. A. D. Bache, F.R.S.—*Obituary.*—Dr. Eli Ives, 455.

Index, 456.
